Hi [REDACTED]

I can confirm that we did an extensive review and there are no additional responsive documents.

TCP operators pick up in the terminal area. There was no change to that mode, so no documentation. TCPs are a very small percentage of total traffic, and most of them park in the garages to wait for their passengers, so they don't have much impact on the terminal curb.

Subject: Re: CPRA request (LAWA.2019.10.29.b)

Hi Ms. Jamison,

So no one decided to allow TCP operators to continue to pick up inside the airport? Or they decided it but didn't write anything down about it? There are no written records, no minutes, notes, meeting agendas, anything like that, about allowing TCP operators to continue to pick up inside the airport? No memos from someone telling staff that they're allowed? How does APD know not to ticket them? How do the TCP operators know they're allowed?

Can you at least confirm that you checked agendas and minutes of every meeting regarding LAXit planning for any mention of TCP operators? This is minimally required for a search to have been adequate. Also, as part of this request, without making me wait another four months, can you send me agendas and minutes for all LAXit planning meetings so that I can confirm that the issue of TCP operator pickup locations was never discussed?
